

Tiger Handheld Portable X-Ray - Human Dental

Acquire | Store | View | Share

The COCOON has enough power and handy weight to be used for both general treatment and operation.

When mobility is needed most frequently, x-rays are important as a progress check in many dental surgical operations. Moving a patient under anesthesia for a wall-mounted x-ray is not only inconvenient and time-consuming for the doctor, but risky for the patient. The COCOON portable handheld x-RAY device allows for true one-hand portable X-RAY shots: as many as 500 shots before recharging. It is more efficient for dentists and oral surgeons, and the operator is also protected by advanced safety features.

FEATURES

- Lightweight - Only 5 lbs
- Cordless
- Digitized Wide Screen & Easy and Intuitive Touch Screen Function
- Customized Preset of Exposure Time for Different Set Positions
- Low Radiation Emitting
- Patented Voice Guide - Cocoon Speaks!
- Clear and Pristine Images with High-Density X-Ray
- Smaller Focal Spot for High-Density X-Ray
- 70 kV Tube Voltage
- 500 Shots per Full Battery Charge
- Radiation Leakage Prevention Technology
- Back Scatter Shield for Operator Protection
- Trigger Locking System to Prevent Unintentional Exposure
- Care-free Power Charging with Charging Dock
