AccuVue

CLOUD

The future of PACS is finally here

User Features

RadmediX
your prescription for Digital Radiology

Radmedix AccuVueCloud computing PACS system delivers both the computing and storage power over the internet. Our solution provides tools for general radiology, cardiology, orthopedics and other specialties throughout your practice & referring physicians. AccuVueCloud allows your facility to deliver improved patient care at a cost effective price.

The AccuVueCloud PACS application not only provides expandable storage space without the cost to upgrade hardware, it offers increased computing power that allows you to view and manipulate hundreds of large images using hand-held mobile devices like the iPad, iPhone and other tablets. When implementing AccuVueCloud, your practice will gain the added efficiency to access images securely anytime, anywhere via cellular or Wi-Fi network access.

Benefits:

• HIPPA Compliant - View images anywhere, anytime

• No IT staff needed (traditional PACS)

• No service contracts

• No software/hardware obsolescence

• View images from any device that you prefer, iPad, iPhone, Tablet, PC or laptop

• No viewing licenses to buy - unlimited

• No Apps to buy/download

• Works with or without a traditional PACS

• Redundant and load balencing archive

• All Images are stored in a secure Tier 3 Data Center

• No more "per study" fees or unused storage charges

• You maintain ownership of all images (no fee to get them back)
