

Product Overview

A Smart and Complete DR Solution

The DELWORKS DRupgrade delivers exceptional diagnostic imaging using a powerful image acquisition and processing software, Cesium Iodide (Csl) detector options, and specialty features such as Auto Exposure Detection (AED) technology.

Its interface features a hassle-free, single console work ow designed to simplify every step of the examination procedure. This provides technologists with fast image preview times, advanced image enhancement capabilities and generator control options — all from a large format LED touchscreen display.

Premium Detector Options

Our DR upgrade o ers lightweight wireless and xed detector options designed to maximize work ow and minimize patient dose, without compromising image quality.

DELWORKS features the world's lightest cassette-sized detectors which promote incredibly fast positioning and readjustments. With up to 8 hours of battery life and AED technology, technologists can bene t from lasting power in even the most demanding medical facilities.

Key Highlights

Single Console Work ow and Generator Integration

Cesium Iodide (Csl) Wireless and Fixed Detector Options

EasyConnect (AED) Technology

2MP Color Touchscreen LED Monitor

DICOM Connectivity (Store, Print, MPPS, MWL)

Image Stitching (Optional)

DELWORKS Desktop, Laptop and FIT Tablet workstation options

Excellent image quality with Technologist and Patient e ciency and safety in mind.

Software and Detector Options

Outstanding Image Quality and Reduced Patient Dose

DELWORKS

DELWORKS is a powerful image acquisition and processing software featuring a user-friendly interface that provides sophisticated and speedy medical imaging. Designed with complex system automation, DELWORKS aims to simplify the examination process by making the dicult decisions for you.

Advanced anatomical programming and image processing algorithms help optimize technologist productivity. DELWORKS strives to minimize human error and unwanted repeat exams to give technologists the highest quality image and lowest dose, with every exposure.

Image Stitching Option

The optional image stitching application automatically or manually combines multiple images into one, for accurate and e ortless full-length spine or leg length images.

Software Features

- Pre-exposure display of patient and procedure information, x-ray generator exposure factors, status and control functions integrated in a single display screen
- Positioning guide: queues proper positioning for each view
- Deviation Index (DI): standard reporting to assist in dose minimization
- Exam-speci c image processing algorithms automatically optimize images based on selected patient anatomy
- Automatically Programmed Radiography (APR) speci c default values with manual adjustment
- Image rotation in 90° steps, horizontal mirroring, automatic and manual image cropping to collimated area

- Easy veri cation and correction of image laterality and patient orientation
- Intuitively add orientation markers and text comments directly to acquired images (pre-de ned or text free)
- PICC tool applies enhanced processing to images for better visualization of leads, lines or tubes
- E ective management, analysis, and reporting of rejected images
- u Detailed histograms of pixel density
- u User selection of modi ed LUT (Look-Up Table) based on various exam types
- u Manual adjustment of the LUT, window and level

u Full array of measurement tools

Premium Detectors Available in Single, Dual, or Multi-Detector Applications

E140w

Ultra-light, portable 14 x 17 in (35 x 43 cm) Cesium wireless detector for outstanding image quality and exibility

E240w

Ultra-light, portable 9.4 x 11.8 in (24 x 30 cm) Cesium wireless detector for pediatric or imaging of smaller body parts

E17C

Large format 17 x 17 in (43 x 43 cm) detector, ed in the vertical wall stand or table providing the maximum imaging area with fast, wired image transfer

LLI

Monolithic (one piece), 17 x 42 in (43 x 107 cm), wireless and portable detector designed for full spine and leg imaging in a single exposure

EasyConnect

DELWORKS wireless detectors feature EasyConnect — an Auto Exposure Detection (AED) technology that keeps the detector in a standby mode, awaiting exposure from any x-ray source. Once an exposure is detected it instantly captures the x-ray image and transmits it wirelessly to the system workstation.

EasyShare

Detectors can be shared between multiple DELWORKS workstations, enhancing work ow, equipment utilization and economic feasibility.

Some examples for reference:

- Sharing an E14Ow detector between an MDR mobile and OTC or FMT Radiographic Suite
- Sharing an E14Ow and an E24Ow detector between a Radiographic Suite and a DELWORKS FIT mobile tablet based system for imaging on the go when needed

CyberSecurity

To provide exceptional patient care without interruption, it is critical for health care providers to have a secure environment, protected against cyberthreats such as viruses or ransomware. UMG/DEL MEDICAL takes our partnership in this seriously and is committed to providing safe, reliable, and secure systems. We deliver product security that helps you achieve compliance with Health Insurance Portability and Accountability Act (HIPAA). Together, we can increase security and privacy.

Portable Workstation

Wireless Versatility

DELWORKS FIT

The DELWORKS FIT Portable Tablet Workstation aims to maximize the portability and e ciency of the DELWORKS software — utilizing it anytime, anywhere.

The user-friendly features of the DELWORKS software are beautifully translated to a rugged tablet PC, capable of withstanding even the harshest radiology (or non-radiology) environments. This handheld workstation features wireless connectivity, plenty of robust, secure solid-state storage space, and a powerful Intel®Core™5 processor to perform rapid and productive patient side studies, without limitations.

Existing analog mobile and portable x-ray devices, radiographic rooms, and other remote or distant locations can greatly bene t from the enhanced adaptability provided by the DELWORKS FIT.

Tablet Features

- Process, review and accept acquired image(s) and wirelessly transfer directly to PACS
- u Full-HD 11.6" wide viewing angle display
- Rugged tablet with both MIL-STD-810G and IP-65 ratings (Tested to handle multiple 4' drops, water, dust and splash resistance)
- u Ultra-light, 3.53 lbs (1.6 kg) with single 2-cell battery

Charging and Screen Mirroring

Placing the DELWORKS Fit tablet in the docking station provides screen mirroring functionality when connected to a larger monitor display. This enables full screen image viewing for an in-room setting.

The docking station also charges the tablet and can be con gured to send images via wired image transfer when the tablet is docked. Wireless image transfer is available directly from the tablet when the tablet is removed from the dock.

DELWORKS Laptop

The DELWORKS Laptop is an option for those who prefer portability combined with built-in keyboard input. This system includes a robust 256 GB Solid State Drive (SSD) and full HD 15.6" display for secure storage and outstanding image display quality.
